Professional Summary

Full stack software engineer with a focus on building React and Next.js applications. Very passionate about using cutting edge technologies and strategies to deliver elegant solutions to problems that are both complex and dynamic. I leverage my unique creative ability, organizational skills, and technical knowledge to approach and tackle challenges with enthusiasm and confidence. Aiming to work with a team of dedicated and passionate individuals in an environment that fosters personal and professional growth.

SKILLS: JavaScript, HTML, CSS, React, Next.js, jQuery, REST, AJAX, Express, NodeJS, Python, Django, Tailwind, postgresSQL

PROJECTS

- **Hiss (Python, Django, postgresSQL, TailwindCSS):** *Lead Developer* | [Github](#) | [Deployed Application](#)

Designed and Implemented a 'Twitter-like' app using Python, Django, and TailwindCSS. Users can post 'tweets' and interact with each other's posts.

- **Pokemon World Tournament (Javascript, Ajax, Pokemon API):** *Lead Developer* | [Github](#) | [Deployed Application](#)

Designed and implemented a Pokemon team battle game using vanilla Javascript and the Pokemon Api. Users can assemble a team and play against the computer.

- **Investing Buddy (React, Express, MongoDB, Node.js(MERN)):** *Lead Backend Developer*

[Frontend GitHub](#) | [Backend GitHub](#) | [Deployed Application](#)

Collaborated with a small team to design and implement a stock market investment training application. Users can simulate purchasing stocks and track their performance.

EXPERIENCE

WalaWala International English Training Center, (Shanghai, China), December 2018 – August 2022

- Planned and Taught comprehensive English classes to both large and small groups of students aged 4-13, improving their English language reading and speaking level.
- Prepared lesson plans implementing school curriculum, ensuring students reached their learning benchmarks.
- Served as the primary video and voice actor for 1000+ hours of educational videos for English learners from beginner to advanced reading levels, helping students across Shanghai improve their abilities.
- Collaborated with teams to create new curriculum and ensure lessons provided optimal educational value to students.

Aerform (Fort Lauderdale, Florida): Manufacturing Associate January 2016 - July 2018

- Worked with a small team to manufacture drogue ocean data collection apparatus for Scripps, NOAA, and other major data collection firms, allowing them to collect large amounts of vital oceanic data.

EDUCATION

General Assembly: Full Stack Software Engineering Immersive Fellowship

Florida State University, (Tallahassee, FL) Graduation: August 2018:

Bachelor of Science in International Affairs with Minor in Mandarin Language
