Professional Summary

I am a full stack software engineer with a focus on building React and Next.js applications. I am very passionate about using cutting edge technologies and strategies to deliver elegant solutions to problems that are both complex and dynamic. I leverage my unique creative ability, organizational skills, and technical knowledge to approach and tackle challenges with enthusiasm and confidence. I aim to work with a team of dedicated and passionate individuals in an environment that fosters personal and professional growth.

SKILLS:

JavaScript, HTML, CSS, React, Next.js, jQuery, REST, AJAX, Express, NodeJS, Python, Django, Tailwind

PROJECTS

My Developer Portfolio: *Lead Developer*

GitHub: | Deployed Application:

Implemented a dynamic React administrative dashboard following a JavaScript Mastery Youtube tutorial, the application leverages the React component library Syncfusion along with high level context to deliver a wide variety of dynamic charts and analytics.

Dissonance Sound Sample Library: *Lead Developer*

GitHub: https://git.generalassemb.ly/chris-codestuff/Disonance | Deployed Application:

Designed and Implemented an open source library for 1000+ audio samples, allowing users to easily search for sounds according to multiple parameters, as well as upload their own sounds and download the samples uploaded by other users for local use.

EXPERIENCE

WalaWala International English Training Center, (Shanghai, China), December 2018 – August 2022

Taught comprehensive English classes to both large and small groups of students aged 4-13. Prepared lesson plans implementing school curriculum to ensure the students reached their learning benchmarks. Maintained a fun learning environment so that students remained both relaxed and engaged.

Served as the primary video and voice actor for over 1000+ hours of educational videos for English learners from beginner to advanced reading levels, lessons were used and enjoyed by thousands of young Chinese learners and their parents throughout Shanghai; collaborated with teams to create new curriculum and ensure lessons provided optimal educational value to students.

Aerform (Fort Lauderdale, Florida): Manufacturing Associate January 2016-July 2018

Worked with a small team to manufacture drogue ocean data collection apparatus' for Scripps, NOAA, and other major data collection firms, allowing them to collect large amounts of vital oceanic data.

John Galt Insurance (Fort Lauderdale, Florida): Sales Associate May 2015-November 2016

Contacted prospective clients to secure new commercial insurance accounts.

EDUCATION

General Assembly: Full Stack Software Engineering Immersive Fellowship

Florida State University, (Tallahassee, FL) Graduation: August 2018:

Bachelor of Science in International Affairs with Minor in Mandarin Language
